Contents of Volume 114

Number 1, 7 May 1985

SCHMIDT, S. K., ALEXANDER, M. and SHULER, M. L., Predicting Threshold Concentrations of Organic Substrates for Bacterial Growth 1

HARTUNG, J., Eusocial Coprophagous Diploids—Who is Reproducing? 9

GRAFSTEIN, D., A Role for Metabolite Enantiomers in the Evolution and Integration of Enzyme Driven Systems 11

BALANOVSKI, E. and BEACONSFIELD, P., Order and Disorder in Biophysical Systems: a Study of the Correlation between Structure and Function of DNA 21

BUSE, M. and WERNER, J., Heat Balance of the Human Body: Influence of Variations of Locally Distributed Parameters . 35

BALDING, D. and MCELWAIN, D. L. S., A Mathematical Model of Tumour-induced Capillary Growth 53

DEFURIA, R. R., DYGERT, M. K. and ALACHI, G. M., Computer Simulation of the P^{31} NMR Equations Governing the Creatine Kinase Reaction 75

HAGEDORN, R. and NEEF, E., The Efficiency of Photosynthetic Energy Conversion in Continuous and Intermittent Light . . . 93

AKINTONWA, D. A. A., The Correlation Between Theoretical and Experimental Biotransformation of 2-Chloro-1-(2′,4′ dichlorophenyl)Vinyl Diethylphosphate(Chlorfenvinphos) in the Dog and Rat 103

ABUGOV, R., Genetics of Darwinian Fitness. II. Pleiotropic Selection on Fertility and Survival 109

TOKO, K., CHOSA, H. and YAMAFUJI, K., Dissipative Structure in the *Characeae*: Spatial Pattern of Proton Flux as a Dissipative Structure in Characean Cells 127

HARRISON, L. G. and HILLIER, N. A., Quantitative Control of *Acetabularia* Morphogenesis by Extracellular Calcium: A Test of Kinetic Theory 177

Number 2, 21 May 1985

MURAKAMI, M., Mutations Affecting the 12th and 61st Amino Acids of p21 Protein Result in Decreased Probability of β-Turn Occurrence around the Mutation Positions: a Prediction . . 193

DAVENPORT, D. and LEE, H., Image Analysis in the Orchidaceae 199

MAWSON, A. R., Speculations on the Origin of the Ill-Effects Associated With the Use of Visual Display Terminals . . . 223

NAGORCKA, B. N. and MOONEY, J. R., The Role of a Reaction-Diffusion System in the Initiation of Primary Hair Follicles 243

KNOPPIEN, P. and REDDINGIUS, J., Predators with Two Modes of Searching: A Mathematical Model 273

CSÁNYI, V. and KAMPIS, G., Autogenesis: The Evolution of Replicative Systems 303

LAWS, E. A., JONES, D. R., TERRY, K. J. and HIRATA, J. A., Modifications in Recent Models of Phytoplankton Growth: Theoretical Developments and Experimental Examination of Predictions 323

WOLMAN, M., Different Modes of Cell Death and Related Phenomena: a Proposal for a Meaningful Terminology in Relation to Tests of Lethality 343

LETTER TO THE EDITOR

MALPRESS, F. H., The Coulombic Hypothesis of Mitochondrial Energy Transduction: a Quantitative Emendation . . 351

Number 3, 7 June 1985

REID, R. E., The Functional Nature of Calcium Binding Units in Calmodulin, Troponin C and Parvalbumin 353

TEASDALE, R. D., CARR, A. R. and READ, R. S. D., Substrate Aggregation and Cooperative Enzyme Kinetics: Consideration of Enzyme Access with Large Aggregates 375

WARD, P. I., Why Birds in Flocks Do Not Coordinate their Vigilance Periods 383

MARESIN, V. M. and PRESNOV, E. V., Topological Approach to Embryogenesis 387

TROQUET, J., LAMBIN, PH. and NELSON, C. V., Experimental Foundation of the Gabor-Nelson Theory Applied to Boundaries Which Are Non-Insulating 399

BERENBAUM, M. C., The Expected Effect of a Combination of Agents: the General Solution 413

WELCH, G. R., Some Problems in the Usage of Gibbs Free Energy in Biochemistry 433

KING, C. C., A Model for Transposon-based Eucaryote Regulatory Evolution 447

SLACK, J. M. W., Homoeotic Transformations in Man: Implications for the Mechanism of Embryonic Development and for the Organization of Epithelia 463

SAUNDERS, P. T. and HO, M. W., Primary and Secondary Waves in Prepattern Formation 491

JAMES, W. H., Sex Ratio, Dominance Status and Maternal Hormone Levels at the Time of Conception 505

Number 4, 21 June 1985

FAITH, D. P., A Model of Immunological Distances in Systematics 511

KAUFMAN, M., URBAINE, J. and THOMAS, R., Towards a Logical Analysis of the Immune Response 527

LIBET, B., Subjective Antedating of a Sensory Experience and Mind-Brain Theories: Reply to Honderich (1984) 563

HUNDING, A., Morphogen Prepatterns during Mitosis and Cytokinesis in Flattened Cells: Three Dimensional Turing Structures of Reaction-Diffusion Systems in Cylindrical Coordinates . . 571

VOIT, E. O., Cell Cycles and Growth Laws: the CCC Model . . 589

SEKERIS, C. E., The Role of HnRNA in the Control of Ribosomal Gene Transcription 601

Briggs, W. E., The Relationship between Zeros and Factors of Binding Polynomials and Cooperativity in Protein–Ligand Binding . 605

Fey, K. and Eichmann, K., Cluster Formation in a Symmetrical Network: a Dynamical System for the Description of the Suppression among Non-immune T Lymphocytes and its Application to the Effects of Immunization 615

Colacicco, G., Arguments Against and Alternatives for an Extracellular Surfactant Layer in the Alveoli of Mammalian Lung 641

Heideger, W. J. and Ferguson, M. E., A Theoretical Model for Calcium Absorption from the Intestinal Lumen . . . 657

Letter to the Editor

Blumenthal, S. J., Palindromic Polynucleotides and the Origin of Biological Chirality 665

Index to Volume 114

ABUGOV, R., Genetics of Darwinian fitness. II. Pleiotropic selection on fertility and survival, 109

Acetabularia morphogenesis, quantitative control of, by extracellular calcium; a test of kinetic theory, 177

Agents, the expected effect of a combination of; the general solution, 413

Aggregation, substrate, and cooperative enzyme kinetics; consideration of enzyme access with large aggregates, 375

AKINTONWA, D. A. A., The correlation between theoretical and experimental biotransformation of 2-chloro-1-(2′,4′ dichlorophenyl)vinyl diethylphosphate (Chlorfenvinphos) in the dog and rat, 103

ALACHI, G. M. (see DEFURIA, R. R.), 75

ALEXANDER, M. (see SCHMIDT, S. K.), 1

Alveoli of mammalian lung, arguments against and alternatives for an extracellular surfactant layer in, 641

Amino acids, 12th and 61st, of p21 protein, affecting mutations result in decreased probability of β-turn occurrence around the mutation positions: a prediction, 193

Antedating, subjective, of a sensory expeience and mind-brain theories: reply to Honderich (1984), 563

Autogenesis: the evolution of replicative systems, 303

Bacterial growth, predicting threshold concentrations of organic substrates for, 1

BALANOVSKI, E. and BEACONSFIELD, P., Order and disorder in biophysical systems: a study of the correlation between structure and function of DNA, 21

BALDING, D. and MCELWAIN, D. L. S., A mathematical model of tumour-induced capillary growth, 53

BEACONSFIELD, P. (see BALANOVSKI, E.), 21

BERENBAUM, M. C., The expected effect of a combination of agents: the general solution, 413

β-turn occurrence around mutation positions, mutations affecting the 12th and 61st amino acids of p21 protein result in decreased probability of; a prediction, 193

Boundaries which are non-insulating, experimental foundation of the Gabor-Nelson theory applied to, 399

Binding polynomials and cooperativity in protein-ligand binding, the relationship between zeros and factors of, 605

Binding units, calcium, the functional nature of, in calmodulin, troponin C and parvalbumin, 353

Biochemistry, some problems in the usage of Gibbs free energy in, 433

Biological chirality, palindromic polynucleotides and the origin of (letter), 665

Biophysical systems, order and disorder in; a study of the correlation between structure and function of DNA, 21

Biotransformation, theoretical and experimental, of 2-chloro-1-(2′,4′ dichlorophenyl) vinyl diethylphosphate (Chlorfenvinphos) in the dog and rat, the correlation between, 103

Birds in flocks, why they do not coordinate their vigilance periods, 383
BLUMENTHAL, S. J., Palindromic polynucleotides and the origin of biological chirality (letter), 665
Brain-mind theories and subjective antedating of a sensory experience: reply to Honderich (1984), 563
BRIGGS, W. E., The relationship between zeros and factors of binding polynomials and cooperativity in protein-ligand binding, 605
BUSE, M. and WERNER, J., Heat balance of the human body: influence of variations of locally distributed parameters, 35

Calcium absorption from the intestinal lumen, a theoretical model for, 657
Calcium binding units, the functional nature of, in calmodulin, troponin C and parvalbumin, 353
Calcium, extracellular, quantitative control of *Acetabularia* morphogenesis by; a test of kinetic theory, 177
Calmodulin, the functional nature of calcium binding units in, 353
Capillary growth, tumour-induced, a mathematical model of, 53
CARR, A. R. (see TEASDALE, R. D.), 375
CCC model; cell cycles and growth laws, 589
Cell cycles and growth laws: the CCC model, 589
Cell death, different modes of, and related phenomena; a proposal for a meaningful terminology in relation to tests of lethality, 343
Cells, Characean, spatial pattern of proton flux as a dissipative structure in, 127
Cells, flattened, morphogen prepatterns during mitosis and cytokinesis in; three dimensional Turing structures of reaction-diffusion systems in cylindrical coordinates, 571
Chirality, biological, palindromic polynucleotides and the origin of (letter), 655
2-Chloro-1-(2′,4′ dichlorophenyl) vinyl diethylphosphate (Chlorfenvinphos) in the dog and rat, the correlation between theoretical and experimental biotransformation of, 103
CHOSA, H. (see TOKO, K.), 127
Cluster formation in a symmetrical network: a dynamical system for the description of the suppression among non-immune T lymphocytes and its application to the effects of immunization, 615
COLACICCO, G., Arguments against and alternatives for an extracellular surfactant layer in the alveoli of mammalian lung, 641
Combination of agents, the expected effect of; the general solution, 413
Conception, sex ratio, dominance status and maternal hormone levels at the time of, 505
Cooperative enzyme kinetics, substrate aggregation and; consideration of enzyme access with large aggregates, 375
Cooperativity in protein-ligand binding, the relationship between zeros and factors of binding polynomials and, 605
Coprophagous diploids, eusocial; who is reproducing?, 9
Coulombic hypothesis of mitochondrial energy transduction: a quantitative emendation (letter), 351
Creatine kinase reaction, computer simulation of the P^{31} NMR equations, 75
CSÁNYI, V. and KAMPIS, G., Autogenesis: the evolution of replicative systems, 303
Cycles, cell, and growth laws; the CCC model, 589

Darwinian fitness genetics. Pleiotropic selection on fertility and survival, 109
DAVENPORT, D. and LEE, H., Image analysis in the Orchidaceae, 199
Death, cell, different modes of, and related phenomena; a proposal for a meaningful terminology in relation to tests of lethality, 343
DEFURIA, R. R., DYGERT, M. K. and ALACHI, G. M., Computer simulation of the P^{31} NMR equations governing the creatine kinase reaction, 75
Diploids, coprophagous, eusocial; who is reproducing?, 9
Disorder and order in biophysical systems: a study of the correlation between structure and function of DNA, 21
Dissipative structure in the *Characeae*: spatial pattern of proton flux as a dissipative structure in Characean cells, 127
DNA, a study of the correlation between structure and function of; order and disorder in biophysical systems, 21
Dog and rat, the correlation between theoretical and experimental biotransformation of 2-chloro-1-(2′,4′ dichlorophenyl) vinyl diethylphosphate (Chlorfenvinphos) in, 103
Dominance status, sex ratio and maternal hormone levels at the time of conception, 505
DYGERT, M. K. (see DEFURIA, R. R.), 75

Efficiency of photosynthetic energy conversion in continuous and intermittent light, 93
EICHMANN, K. (see FEY, K.), 615
Embryogenesis, topological approach to, 387
Embryonic development mechanism, and homoeotic transformations in man, 463
Enantiomers, metabolite, in the evolution and integration of enzyme driven systems, a role for, 11
Energy, free, Gibbs, in biochemistry, some problems in the usage of, 433
Energy, photosynthetic, conversion efficiency in continuous and intermittent light, 93
Energy transduction, mitochondrial, the coulombic hypothesis of; a quantitative emendation (letter), 351
Enzyme driven systems, a role for metabolite enantiomers in the evolution and integration of, 11
Enzyme kinetics, cooperative, substrate aggregation and; consideration of enzyme access with large aggregates, 375
Epithelia organization, and homoeotic transformations in man, 463
Eucaryote regulatory evolution, transposon-based, a model for, 447
Eusocial coprophagous diploids—who is reproducing?, 9
Evolution and integration of enzyme driven systems, a role for metabolite enantiomers in, 11
Evolution, regulatory, eucaryote, transposon-based, a model for, 447
Evolution of replicative systems; autogenesis, 303

FAITH, D. P., A model of immunological distances in systematics, 511
FERGUSON, M. E. (see HEIDEGER, W. J.), 657
Fertility and survival, pleiotropic selection on; genetics of Darwinian fitness, 109
FEY, K. and EICHMANN, K., Cluster formation in a symmetrical network: a dynamical system for the description of the suppression among non-immune T lymphocytes and its application to the effects of immunization, 615

Fitness, Darwinian, genetics of; pleiotropic selection on fertility and survival, 109
Follicles, hair, primary, the role of a reaction-diffusion system in the initiation of, 243
Function and structure of DNA, a study of the correlation between; order and disorder in biophysical systems, 21

Gabor-Nelson theory applied to boundaries which are non-insulating, experimental foundation of, 399
Gene transcription, ribosomal, the role of HnRNA in the control of, 601
Genetics of Darwinian fitness. Pleiotropic selection on fertility and survival, 109
Gibbs free energy in biochemistry, some problems in the usage of, 433
GRAFSTEIN, D., A role for metabolite enantiomers in the evolution and integration of enzyme driven systems, 11
Growth, bacterial, predicting threshold concentrations of organic substrates for, 1
Growth, capillary, tumour-induced, a mathematical model of, 53
Growth laws, cell cycles and; the CCC model, 589
Growth of phytoplankton, modifications in recent models of; theoretical developments and experimental examination of predictions, 323

HAGEDORN, R. and NEEF, E., The efficiency of photosynthetic energy conversion in continuous and intermittent light, 93
Hair follicles, primary, the role of a reaction-diffusion system in the initiation of, 243
HARRISON, L. G. and HILLIER, N. A., Quantitative control of *Acetabularia* morphogenesis by extracellular calcium: a test of kinetic theory, 177
HARTUNG, J., Eusocial coprophagous diploids—who is reproducing?, 9
Heat balance of the human body: influence of variations of locally distributed parameters, 35
NEIDEGER, W. J. and FERGUSON, M. E., A theoretical model for calcium absorption from the intestinal lumen, 657
HILLIER, N. A. (see HARRISON, L. G.), 177
HIRATA, J. A. (see LAWS, E. A.), 323
HnRNA, role in the control of ribosomal gene transcription, 601
HO, M. W. (see SAUNDERS, P. T.), 491
Homoeotic transformations in man: implications for the mechanism of embryonic development and for the organization of epithelia, 463
Hormone levels, maternal at the time of conception, sex ratio, dominance status and, 505
Human body heat balance: influence of variations of locally distributed parameters, 35
HUNDING, A., Morphogen prepatterns during mitosis and cytokinesis in flattened cells: three dimensional Turing structures of reaction-diffusion systems in cylindrical coordinates, 571

Image analysis in the Orchidaceae, 199
Immune response, towards a logical analysis of, 527
Immunization, a dynamical system for the description of the suppression among non-immune T lymphocytes and its application to the effects of; cluster formation in a symmetrical network, 615

Immunological distances in systematics, a model of, 511
Intestinal lumen, a theoretical model for calcium absorption from, 657

JAMES, W. H., Sex ratio, dominance status and maternal hormone levels at the time of conception, 505
JONES, D. R. (see LAWS, E. A.), 323
